

Magento Retailer Plugin Installation Guide

Step 1

Log in and install the Referboard Retailer plugin from Magento Connect [here](#).

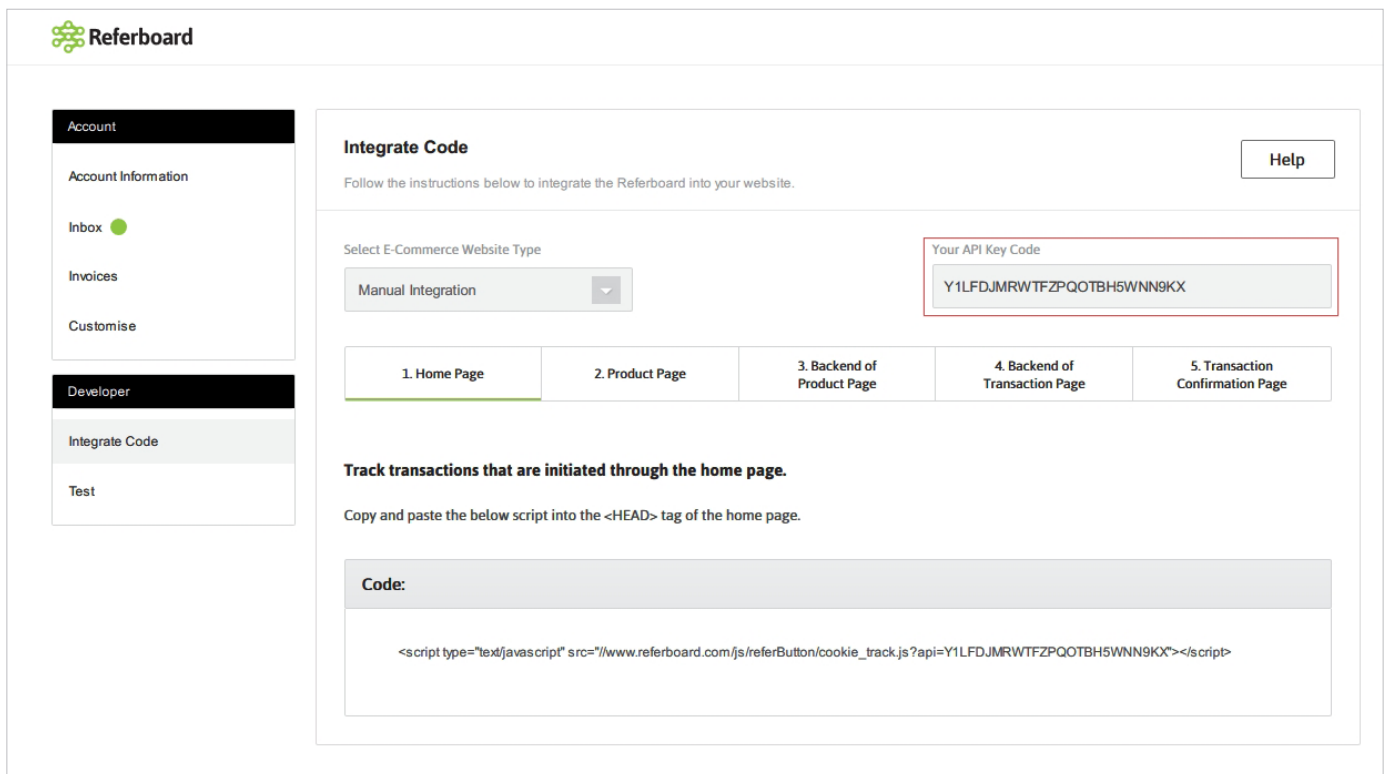

After installation is complete, go to your Marketplace and within 'My Access Keys' find the Referboard plugin and copy the 'Access Key'.

Log in to your Magento Connect Manager and paste the access key into the 'Extension Key' where required.

Step 2

Log in to your Referboard account, select 'Integrate Code' tab in the left column.

Copy the API key.

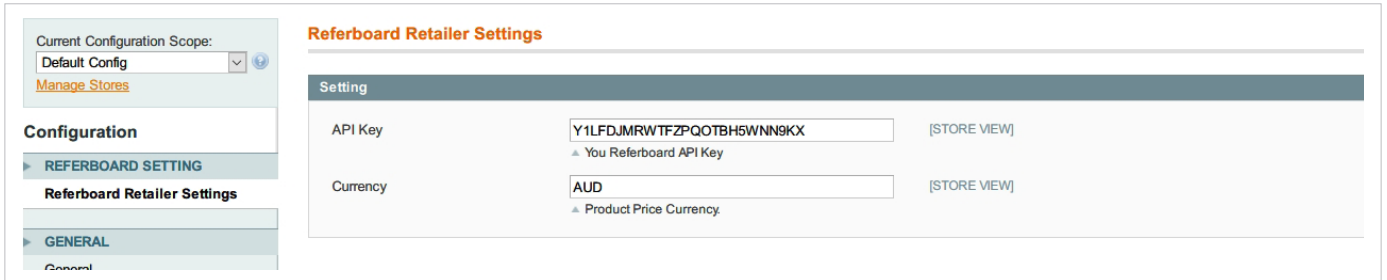

The screenshot shows the Referboard 'Integrate Code' interface. On the left is a navigation menu with 'Account' and 'Developer' sections. The 'Integrate Code' option is selected under the 'Developer' section. The main content area is titled 'Integrate Code' and includes a 'Help' button. Below the title, there are instructions to follow for integration. A dropdown menu for 'Select E-Commerce Website Type' is set to 'Manual Integration'. To the right, a text box displays the 'Your API Key Code' as 'Y1LFDJMRWTFZPQOTBH5WNN9KX'. Below this, there are five tabs for selecting the integration point: '1. Home Page' (selected), '2. Product Page', '3. Backend of Product Page', '4. Backend of Transaction Page', and '5. Transaction Confirmation Page'. The instructions specify tracking transactions initiated through the home page and provide a code snippet to be pasted into the <HEAD> tag of the home page.

```
<script type="text/javascript" src="//www.referboard.com/js/referButton/cookie_track.js?api=Y1LFDJMRWTFZPQOTBH5WNN9KX"></script>
```

Step 3

Log in to your Magento website settings with admin privileges and activate the Referboard Retailer plugin. Select 'Referboard Retailer Settings' in the left menu on the 'System > Configuration' Page. Enter the API key and type the currency 'AUD', press 'Save' to confirm changes.

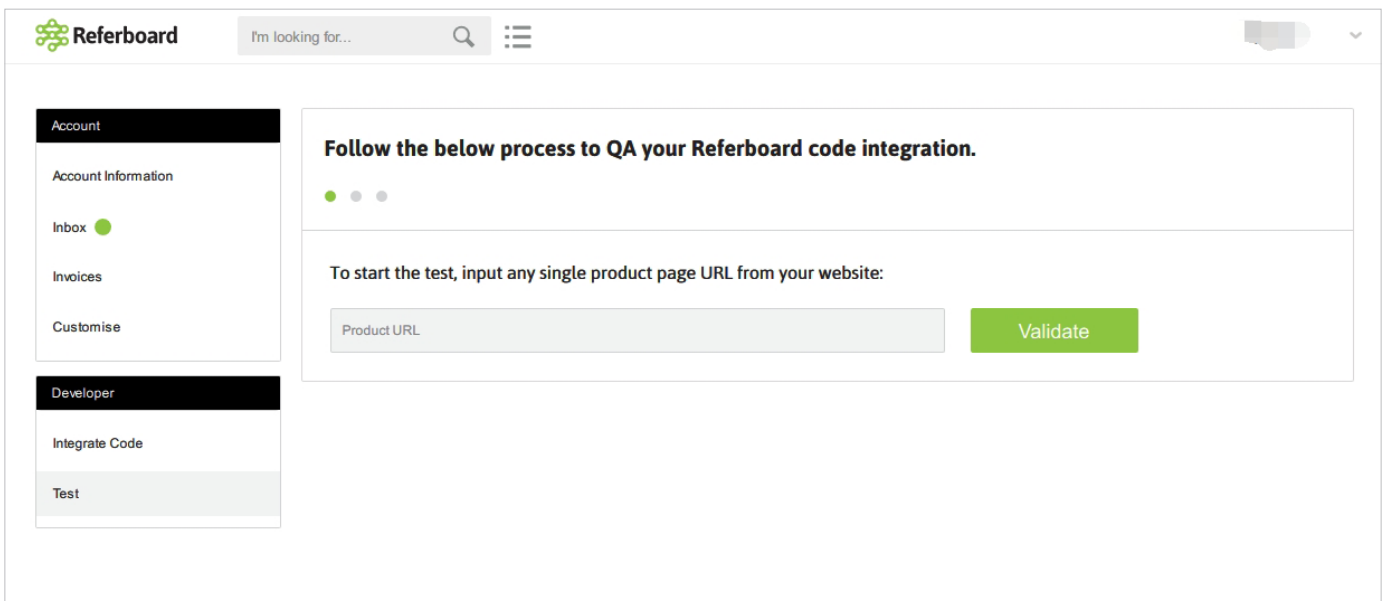

The screenshot shows the Magento Admin interface. On the left, the 'Configuration' menu is expanded to 'Referboard Retailer Settings'. The main content area is titled 'Referboard Retailer Settings' and contains two settings:

Setting	
API Key	<input type="text" value="Y1LFDJMRWTFZPQOTBH5WNN9KX"/> [STORE VIEW] <small>▲ You Referboard API Key</small>
Currency	<input type="text" value="AUD"/> [STORE VIEW] <small>▲ Product Price Currency</small>

Step 4

Return to your Referboard account, go to the 'Test' tab in the left column and complete the test process to activate your account.

The screenshot shows the Referboard account dashboard. The left sidebar has a menu with 'Account' (selected), 'Account Information', 'Inbox', 'Invoices', 'Customise', 'Developer', 'Integrate Code', and 'Test'. The main content area has a heading: 'Follow the below process to QA your Referboard code integration.' Below this is a progress indicator with three dots, the first of which is green. The text says: 'To start the test, input any single product page URL from your website:'. There is a text input field labeled 'Product URL' and a green 'Validate' button.

If you require any additional help please log in to your Referboard Retailer account and activate the live chat platform in the bottom right corner of the screen. Alternatively, you can contact support@referboard.com.
